

SONITEC NOZZLE

Sonitec nozzles are a new advancement in baghouse and dust collector cleaning. They can be retrofit into your existing collector blowpipes. Immediately you will see a difference with increased flow and reduced differential pressure drop across the baghouse.

Available in brass and stainless steel

Features & Benefits

- Removal of the venturi now doubles the open flow area through the tube sheet
- Nozzles are attached to the blowpipe and are never replaced, whereas venturies are disposed of with the cages
- Now cage costs can be reduced up to 30% since venturies can be omitted
- Unique venturi design has been shown to be effective for bags up to 16' long
